

xinetd

Pakete

CentOS 5 :

```
xinetd
```

ps netzwerkfähig machen

/etc/xinetd.d/psax :

```
# description: ps ax netzwerkfaehig

service psax
{
    socket_type      = stream
    wait             = no
    user             = root
    server           = /bin/ps
    server_args      = ax
}
```

/etc/services :

```
psax          48620/tcp          # ps ax
```

```
service xinetd restart
```

testen

```
telnet localhost 48620
```

oder

```
nc localhost 48620
```

Doku

- `man xinetd.conf`
